## "SILENT TICK ALARMS"

Absolutely no Tick to be heard

Thousands of people would gladly buy such an Alarm if they only knew Alarms with a silent tick were in existence. Why not stock these and demonstrate them as often as possible?  
You would find many a Customer who is a light sleeper, who would be glad of this boon.  
A special label is supplied with each Alarm, which can be fixed to the back, to draw attention to this Silentic feature, when in your display windows.
