

THEME: TECHNO-LINE

Technology determines the function.
Design determines the appearance.
Both stand for TECHNO-LINE from
JUNGHANS.

Example:
THE NEW JUNGHANS

- ② **Model: 150/1001 black**

The JUNGHANS radio-controlled message clock RC alarm 1 sets itself automatically to the correct time. Accurate down to the second. It receives a radio-transmitted time pulse from the world's most accurate clock - the caesium time base Braunschweig/Germany. So you need never set it. As all radio-controlled clocks from JUNGHANS it changes from summer to winter time and vice-versa. Fully automatically. It has an alarm function and reminds you of appointments with greatest precision. And your eternal calendar will never be mistaken.

You can check reception with the unique transmitter call button just to be absolutely sure.
