Wall and  
mantel clocks

 JUNGHANS

## JUNGHANS – The Company

Schramberg is not perhaps one of the best known towns, but it has definitely not gone unnoticed in the watch and clock-making industry. JUNGHANS Uhren GmbH, the third-largest quartz watch and clock producers in the world, is located here in the district of Rottweil. JUNGHANS is a company with its fair share of tradition and is never short of new ideas.

More than 60,000 watches and clock movements are produced in Schramberg every day using modern automated watch and clock-making facilities. Ultramodern electronic equipment monitors and controls very high quality standards in all production processes.

JUNGHANS manufactures electronic wrist watches, alarm clocks, wall and mantel clocks, quartz movements, solar and radio-controlled clocks and watches. All of very high quality, accuracy and functionality using the most modern, future-orientated technologies. All good reason why JUNGHANS enjoys the image of an innovative watch and clockmaker.

Radio-controlled and solar clocks and watches are amongst the most popular on today's market. The first radio-controlled solar watch in the world, the JUNGHANS RCS 1, is proof of the great innovative strength and highest technological standards at JUNGHANS.

JUNGHANS brought out the world's first radio-controlled solar watch – the JUNGHANS RCS 1 – only 4 years ago lending these new technologies a new perspective.

## JUNGHANS – The Trademark

The JUNGHANS trademark is considered to be the most traditional trademark for watches and clocks amongst German producers. It is known throughout the world for highest quality standards, reliability and above all innovative strength in technology and design as documented in countless awards.

Technological concept, function and design of JUNGHANS watches and clocks are constantly adapted to the changing attitudes and wishes of the consumer. Good reason why JUNGHANS is able to impressively provide a broad range of watches and clocks reflecting zeitgeist combined with innovative design and modern technology time and again.

... when the sun shines through the window it's a dream living here. Your dream, your world that you have created for your life style ...

## THEME: MODERN LIFE STYLE

Clear-cut lines. Light and design. Technology and functionality. The experience when everything harmonises. Life style.

STYLE**

Clear-cut lines. Light and design. Technology and functionality. The experience when everything harmonises. Life style.

**JUNGHANS  
RADIO-  
CONTROLLED CLOCKS  
RELIABILITY OF  
THE VERY HIGHEST  
STANDARD.**

You will never need to set a JUNGHANS radio-controlled clock. It sets itself fully automatically to the radio-transmitted time signal of the most accurate clock in the world, the caesium time base of the Government Agency for Physical and Technical Sciences in Braunschweig. It is so accurate that it can be expected to lose or gain only one second in one million years' time.

JUNGHANS radio-controlled clocks also change from winter to summer time and vice-versa fully automatically. You can check reception with the unique transmitter call button.

JUNGHANS radio-controlled clocks don't just measure time, they incorporate a completely new chronological dimension.

## JUNGHANS SOLAR 1: A FASCINATION FOR TECHNOLOGY.

The JUNGHANS "Solar 1" quartz  
watch draws its energy from light.  
Constantly and free of charge.  
When fully charged its high per-  
formance energy store ensures  
that your watch will easily keep on  
going through 750 hours of dark-  
ness - no problem. A start/stop  
switch safeguards this high energy  
reserve. JUNGHANS solar watches  
superbly accurate, unproblematical  
and reliable.

### JUNGHANS Radio-controlled clocks

- Mains-dependent  
Typical operating  
time with 1 battery:  
(1.5V baby cell  
IEC LR 141) ≈ 3 years
- Integrated radio  
receiver to receive  
the time signal  
transmitter. DCF77 on 77.5 kHz
- Ferrite antenna  
with omni-directional  
characteristic
- Transmitter call  
button to check  
reception at any time
- Setting time with  
undisturbed reception: 2-6 mins
- Adjustment time  
(summer/standard time): 3 or 33 secs
- Time comparison with  
transmitter: every full hour
- Quartz time base: 32 kHz
- Operating voltage range: 1.3-1.7V
- Operating temperature: -10°C to +50°C
- Average power  
consumption: typ. 85 µA

... as the clocks from the master craftsman. There may be a world's difference in design and a century of clockmaking technology between them. As shown here between the traditional Black Forest cuckoo clock and the JUNGHANS radio-controlled clock receiving time pulses accurate to a millionth of a second by radio.

### JUNGHANS Radio-controlled clocks

- Mains-dependent  
Typical operating time with 1 battery: IEC LR 141
- Integrated radio receiver to receive the time signal transmitter:
- Ferrite antenna with omni-directional characteristic
- Transmitter call button to check reception at any time
- Setting time with undisturbed reception:
- Adjustment time (summer/standard time):
- Time comparison with transmitter:
- Quartz time base:
- Operating voltage range:
- Operating temperature:
- Average power consumption:

## THEME: LIFE AND WORK STYLE

"Time" as a room accessory. Practical, classic, strict. Functional. Or even counterpoint. In colour and material. But always accurate. Time to work. And time to live.

#### THE NEW JUNGHANS RADIO-CONTROLLED CLOCK RC alarm 1

The JUNGHANS radio-controlled message clock RC alarm 1 sets itself automatically to the correct time. Accurate down to the second. It receives a radio-transmitted time pulse from the world's most accurate clock - the caesium time base Braunschweig/Germany. So you need never set it. As all radio-controlled clocks from JUNGHANS it changes from summer to winter time and vice-versa. Fully automatically. It has an alarm function and reminds you of appointments with greatest precision. And your eternal calendar will never be mistaken. You can check reception with the unique transmitter call button just to be absolutely sure.

- Radio-controlled alarm clock and timer with LCD display
- Absolutely noiseless
- Indication of hour, minute and second
- Alarm time indication of hour and minute
- Indication of the date, day, month
- Optical reception control
- Alarm time: 1 minute
- Automatic repeating alarm (nozeal every 4 minutes)
- 24 h "Off" automatism
- Runs for approx. 3 years with 1 battery (IEC LR 6)
- Independent from the mains supply
- Free of charge
- Fully automatic time adjustment and time change-over
- Case made of antistatic impact-resistant ABS material
- Size: 11.0 x 9.5 x 6.0 cm
- Model: 150/1000 white
- Model: 150/1001 black

... of course the visual impression is all important. Ars vivendi - the art of living - is also the art of stimulating all the senses, all of them ...

## THEME: CUISINE AND LIFE STYLE

Nostalgic or modern design. Rustic, robust or delicate. Clocks blend in with their surroundings. And sometimes they are even practical: time for the second best thing in the world.
