

Radio-controlled wristwatches
from the inventor.*

 **JUNGHANS**
Timely innovation.

Runs perpetually and never gains or loses.

Radio-control precision means that Junghans Mega Solar Ceramic never gains or loses, because it is linked by radio signal to the most accurate clock in the world. Environment-friendly solar technology means that it runs perpetually. And a high-quality ceramic case, almost as hard as diamond, makes it everlasting and allows the antenna to be integrated.

Model 018/1500
Junghans Mega Solar Ceramic
Ceramic case with anthracite matt-blasted surface finish. Dial outer ring with hour dots in green. Sapphire glass. Matt-black calfskin wriststrap.

Model 018/1501
Junghans Mega Solar Ceramic
Ceramic case with anthracite high-gloss polished finish. Dial outer ring with hour dots in gold-bronze. Sapphire glass. Brown leather wriststrap.

- * environment-friendly thanks to solar energy
- * power reserve for more than 6 months of darkness
- * precise timekeeping thanks to radio-control technology
- * automatic time setting
- * automatic changeover to summer/winter time
- * time zone adjustment
- * antenna integrated in the case

(Junghans Mega Solar Ceramic)

Model 018/1502.44
Junghans Mega Solar Ceramic
Ceramic case with anthracite matt-blasted finish. Metallic silver dial outer ring. Sapphire glass. Solid stainless-steel adjustable bracelet, alternate links polished and brushed respectively.

Model 018/1504.44
Junghans Mega Solar Ceramic
Ceramic case with anthracite high-gloss finish. Ceramic bracelet with printing and titanium-coloured vapour plating. Ceramic bracelet with high-gloss polished ceramic links on a polyurethane/silicone base in matt black.

Model 018/1503.44
Junghans Mega Solar Ceramic
Ceramic case with anthracite high-gloss polished finish. Metallic gold dial outer ring. Sapphire glass. Solid stainless-steel adjustable bracelet, bicolour, alternate links polished and brushed respectively.

- * scratchproof, high-quality ceramic (allergy-tested, harder than stainless steel)
- * LCD display with selectable functions (seconds, perpetual date, reception indicator)
- * transmitter call button
- * water-resistant to 30 m

Allergy-tested

* In 1990 Junghans presented the world's first ever radio-controlled wristwatch; the original.

Elegant understatement

Radio-controlled wristwatches from Junghans constantly produce pleasant surprises: state-of-the-art watch technology with a classic modern look and featuring internal time memory, transmitter call button plus digital date and seconds. Incidentally, Junghans Mega radio-controlled wristwatches lose just one second in a million years.

Model 019/4401.44

Junghans Mega
Stainless-steel case, mineral glass, Junghans Mega-Tec bracelet.

Model 019/4402

Junghans Mega
Blue PVD-coated stainless-steel case. Stainless-steel bezel. Mineral glass. Leather wriststrap.

- * automatic time setting
- * automatic changeover to summer/winter time
- * integrated time memory
- * time zone adjustment
- * perpetual calendar
- * battery change and reception indicator
- * transmitter call button

All models feature a digital display for seconds and date.

Model 019/7403
Junghans Mega
10-micron gold-plated stainless-steel case. Mineral glass. Leather wriststrap.

Model 019/1404
Junghans Mega
Allergy-tested. Solid titanium case. Mineral glass. Vegetable tanned leather wriststrap.

The Champion.

There are good reasons why Junghans Mega Chrono alarm is regarded as the champion amongst chronographs. It is the world's first radio-controlled alarm chronograph featuring alarm functions with radio-control precision. It has a stopwatch function accurate to 1/10th of a second and also split time feature, addition stopwatch and countdown functions. These and all other functions are shown on the illuminated LCD display.

(Junghans Mega Solar)

Pure technology.

An unmistakable look that gets noticed: Junghans Mega, - the most accurate watches in the world. The dial alone - with its integrated LCD display for date, battery change and reception indicator - reveal the technical sophistication of this radio-controlled wristwatch.

Model 025/7105
Junghans Mega
 Stainless-steel case with 10-micron gold-plating. Mineral glass with protective TDS coating. Leather wriststrap.

Model 025/4100
Junghans Mega
 Non-biased stainless-steel case. Mineral glass. Leather wriststrap.

(Junghans Mega)

Model 025/4101 Junghans Mega
 Stainless-steel case, matt anthracite and PVD-coated. Convex mineral glass. Leather wriststrap. Luminous hands.

Perfection through innovation.

The world's first ever radio-controlled solar wristwatch brings together state-of-the-art radio-control technology and environment-friendly solar technology in the most compact space: Junghans Mega Solar. In a word, it runs perpetually and never gains or loses.

Model 021/4400
Junghans Mega Solar
 Non-biased stainless-steel case. 10-micron gold-plated bezel. Convex sapphire glass. Leather wriststrap.

No setting, no summer time adjustment and absolute radio-controlled precision.

The Classic.

In 1990 Junghans presented the world's first ever radio-controlled wristwatch: Junghans Mega 1. Featuring a large digital display with futuristic design and state-of-the-art radio-control technology, it paved the way for the successful development of Junghans radio-controlled watches. Today it is rightly considered as the classic.

(Junghans Mega 1)

**Model 026/0013
Junghans Mega 1**
Matt anthracite, PVD-coated case, convex mineral glass. Leather wriststrap.

**Model 150/2001
Junghans Mega sensor alarm**
7.0 x 9.7 x 4.0 cm. Radio-controlled alarm clock. Display light and alarm repetition are activated by moving your hand gently above the sensor. Light grey case.

**Model 150/2000
Junghans Mega sensor alarm**
7.0 x 9.7 x 4.0 cm. Radio-controlled alarm clock. Display light and alarm repetition are activated by moving your hand gently above the sensor. Anthracite case.

**Model 150/1030
Junghans Mega alarm**
12.5 x 6.5 x 3.2 cm. Radio-controlled alarm clock. Large digital display. Time zone adjustment. Display light. Anthracite case.

Radio-control technology not only for wearing on your wrist.

Sophisticated functional features and extreme reliability are guaranteed not only with radio-controlled wristwatches from Junghans, but also with radio-controlled alarm clocks, such as Junghans Mega travel, Junghans Mega alarm and Junghans Mega sensor alarm. In short, you can have precision, successful technology and optimum convenience at all times, whether at home or when travelling.

**Model 154/1001
Junghans Mega alarm**
9.0 x 9.3 x 5.0 cm. Radio-controlled alarm clock. Analog time display. All digital functions on the LCD display. Display light. Light gray case.

**Model 154/1000
Junghans Mega alarm**
9.0 x 9.3 x 5.0 cm. Radio-controlled alarm clock. Analog time display. All digital functions on the LCD display. Display light. Anthracite case.

(radio-control precision)

**Model 153/9000
Junghans Mega travel**
8.0 x 8.8 x 2.3 cm. Radio-controlled travel alarm clock. Anthracite case. Display light. Also available in light gray.

The chronology of world firsts.

"Shaping the future requires the courage to take risks".
That is the Junghans philosophy.

1990 In this year Junghans presented the world's first
ever radio-controlled wristwatch: Junghans Mega I.
The original. A watch which made timekeeping history.

Since then Junghans has continuously developed radio-control technology: from the first radio-controlled wristwatch with hands (Junghans Mega) through to the first ladies' radio-controlled wristwatch (Junghans Mega Lady), and the world's first ever radio-controlled solar wristwatch (Junghans Mega Solar). With the Mega Solar, Junghans has turned an age-old dream into a reality, namely a watch that runs perpetually and never gains or loses.
