

Junghans brochure

The Junghans brochure provides a handy insight into the individual lines with selected models as highlights. The first pages take a look at the brand environment and depth of manufacturing. A complete overview of the collections can be found in reduced size on the back pages. The brochure is not intended to replace the Brand Book, but is particularly suitable for mailings and for customers who would like information about the Junghans brand at home, without taking the large Brand Book with them.
